ALLNET PrimeTwo series – Google GMS-certified Android touch displays for professional applications

The **ALLNET PrimeTwo series** comprises high-quality Android touch displays in the following sizes: **10", 12", 15", 18", 21", 24" and 27"**. The series has been specially developed for professional use and is ideal for digital signage, kiosk systems, room booking, smart buildings, retail, industry, POS applications, as well as information and self-service terminals.

Powered by the high-performance **Rockchip RK3576 processor** in conjunction with **Android 14**, **8 GB of RAM** and **64 GB of internal flash storage**, the PrimeTwo series offers a fast and reliable platform for demanding business applications. Storage can be flexibly expanded via **USB** or **microSD card**.

A key feature of the PrimeTwo series is its **Google Mobile Services (GMS) certification**. This means that the **Google Play Store** and all major Google services, such as Google Maps, Google Chrome, Google Drive and Google Meet, are officially available. Businesses benefit from a secure, certified Android platform with high compatibility with a wide range of professional apps.

The brilliant touchscreens ensure intuitive operation and excellent display of applications and media content. With **Power over Ethernet (PoE+)**, both the network connection and power supply can be provided via a single Ethernet cable. This significantly simplifies installation and reduces the amount of cabling required – particularly for wall-mounted and permanently installed systems.

For applications in the fields of identification, access control or contactless payment, the PrimeTwo series supports connection of the **ACR1252U-MW Wallet Mate** NFC reader via USB. In conjunction with Google certification, this enables, amongst other things, modern NFC applications and **Google Wallet**-based payment

solutions.

Highlights

- Available in **10", 12", 15", 18", 21", 24" and 27"**
- Powerful **Rockchip RK3576** octa-core processor
- **Android 14**
- **Google Mobile Services (GMS) certified**
- Official **Google Play Store** and Google services integrated
- **8 GB RAM** and **64 GB flash storage**
- Storage expansion via **USB** and **microSD**
