EAN CODE

4 0 3 8 8 1 6 2 6 8 4 5 7

Highlights

- Mast bracket for masts with a diameter of 67–127 mm (2.6–5 inches)
- Secure mounting with robust stainless steel clamps – no drilling required on the mast
- Designed for the stable outdoor mounting of IP cameras
- Adapter for pole mounting in combination with suitable wall brackets and junction boxes
- Compact design: 180 × 138.5 × 47 mm, weighing approx. 1 kg

Product description

With the **ALLNET ALL-CAM25xxPoleMount**, you can mount your IP cameras exactly where there is no wall: on poles, lampposts or posts. The pole mount is suitable for poles with a diameter between 67 and 127 mm, thus covering a wide range of common pole sizes for outdoor use.

It is secured using stainless steel clamping straps, which are wrapped around the pole and tightened. This creates a secure, torsion-resistant connection without the need to drill into the pole. This makes installation quick and gentle on the existing infrastructure, for example in car parks, on company premises, at building sites or along access roads.

The ALL-CAM25xxPoleMount acts as a link between the pole and the camera mounting accessories: suitable wall brackets or junction boxes are screwed onto the adapter, and the camera is then mounted onto it as usual. This allows the same camera to be used either on a wall or on a pole, depending entirely on the conditions on site.

ALLNET GmbH - Maistraße 2 - 82110 Germering - sales@allnet.de - 089 / 894 222 22

Errors and technical changes that serve the interests of progress or development of the product, are reserved.

With dimensions of 180 × 138.5 × 47 mm and weighing around 1 kg, the mount is compact yet sturdy enough for long-term outdoor use.
