Symmetrical Horn Antenna
SH-TP 5-80

SYMMETRICAL HORN ANTENNA WITH
TWISTPORT CONNECTOR AND CARRIER CLASS PERFORMANCE

The SH-TP Series Sectors offer unique RF performance in a very compact package. Scalar horn antennas have symmetrical beams with identical patterns in the Vertical and Horizontal plain. Extremely small Side lobes are inherent to this type of antenna so interference is greatly decreased. SH-TP Antennas are ideal for covering areas with close in clients where null zone issues occur. High density AP clusters and radio Co-location is now practical due to our very unique RF radiation patterns.

All SH-TP Antennas are equipped with a unique TwistPort™, our patent pending wave guide connector. TwistPort™ connectors are virtually loss-less and a revolutionary leap forward in wireless system scalability and convenience of deployment. SH-TP Antennas are compatible with any TwistPort™ equipped radios. Our antennas support a wide range of third party radios from mainstream vendors with our TwistPort™ Adapters along with our RF elements® Simper™ Radios.
