ALLNET Vesa-2P75100 – The versatile wall mount for TVs and monitors

Universal compatibility
The **ALLNET Vesa-2P75100** wall mount is perfect for flat and curved screens from 10 to 32 inches and supports devices weighing up to 20 kg. Thanks to its VESA compatibility (75x75 and 100x100), it is the ideal solution for monitors and televisions. With just a single hand movement, the screen can be effortlessly rotated to portrait orientation – ideal for flexible use.

Extendable and swivelling function
Experience maximum freedom of movement: the mount can be tilted by 16° and swivelled by 180°, giving you an optimal view from any position in the room. The extendable arm (80 to 420 mm) offers additional flexibility, whilst the integrated cable management system ensures your cables are neatly and securely organised.

90° rotation for even more possibilities
With its handy 90° rotation function, the wall mount allows you to switch easily to portrait mode – perfect for viewing videos, photos or documents. This feature makes it indispensable not only for home use but also for small offices.

High-quality workmanship and aesthetics
The mount is made of robust steel and comes with all the necessary fixing materials. Concealed screws, thanks to elegant decorative caps, give the design a stylish and tidy appearance. Soft inserts reliably protect the back of your monitor or television from scratches.

Errors and technical changes that serve the interests of progress or development of the product, are reserved.

Reliable service and quality
The **ALLNET Vesa-2P75100** undergoes strict quality controls and is delivered to your home securely packaged. Our customer service team is always on hand to answer any questions you may have about installation and use.
