ALLNET ISP Bridge Modem VDSL2 / SuperVectoring zbh. Wall bracket for ALL-BM210

>>> Go to the shop article

EAN CODE

4 0 3 8 8 1 6 1 0 8 5 8 6

Optional wall mounting bracket with 2 bolts. The ALL-BM210 can be hung in this bracket with the ports facing up or down. With this bracket, you do not need to measure and mark any drilling templates or drill holes. Simply screw the plate to the wall and hook in the unit = done.

ATTENTION:

For the wall-mounted installation, we have thought about how we can integrate/implement an anti-theft device. The solution here is that the two lugs for an active anti-theft device have to be bent a little so that it engages with the original wall mounting holes on the ALL-BM210. See the picture below where this can be seen. To release it from the wall bracket, the sheet metal parts must be bent away with a thin screwdriver and then it can snap out of the bracket.
