EAN CODE

4 0 3 8 8 1 6 1 6 3 8 7 5

Highlights

- **Designed for external corners:** For mounting network cameras on the external corners of buildings
- **Versatile:** Suitable for bullet, dome, panoramic and PTZ network cameras
- **Robust construction:** A substantial weight of 900 g for a stable, secure mounting
- **Compact dimensions:** Only approx. 170 × 152.5 × 76 mm
- **Professional installation appearance:** Neat camera mounting on building corners instead of makeshift solutions

Product description

The **ALL-CAM25xxCornerMount** is an external corner mount specially designed for installing network cameras on the external corners of buildings. Where there is no flat wall surface, or where a camera is to be deliberately positioned on a building corner, the ALL-CAM25xxCornerMount provides a stable and neat mounting base.

Building corners are among the most strategically important mounting points in video surveillance: depending on the camera type and orientation, they provide a view of the adjacent sides of the façade and access areas. With the ALL-CAM25xxCornerMount, installers can capitalise on this advantage without having to compromise on stability or aesthetics.

Weighing 900 g, the mount is robustly constructed and provides a secure base for camera installation. At the same time, with dimensions of approx. 170 × 152.5 × 76 mm, it remains compact and blends unobtrusively into the façade.

ALLNET GmbH - Maistraße 2 - 82110 Germering - sales@allnet.de - 089 / 894 222 22

Errors and technical changes that serve the interests of progress or development of the product, are reserved.

The ALL-CAM25xxCornerMount is designed for a wide range of cameras: from compact mini-bullet and mini-dome models, through motorised bullet and dome cameras, to panoramic and PTZ cameras. This makes it a versatile solution for projects involving different types of cameras.

Technical specifications

Model	ALL-CAM25xxCornerMount
Product type	External corner mount for network cameras
Area of application	Mounting of cameras on an external corner
Weight	900 g
Dimensions	approx. 170 × 152.5 × 76 mm*
