ALLNET Medical PoE Tablet 13 inch with RK3568 Android 11 4GB/16GB with optional one-touch button and microphone for e.g. emergency call function (API) for integration into your own software

The **MedTab** from ALLNET impresses with its simple, appealing design and the latest Android software. The buttons are easy to reach and intuitive to use. The cables are securely fixed behind the Vesa holder, which minimises the risk of damage to the connections and makes access more difficult for curious patients.

The trays are made of abrasion-resistant plastic and are also resistant to aggressive cleaning agents.

The tablet is powered by a powerful RK3568 Rockchip Quad Core processor, ideal for media playback such as FullHD videos and music.

The tablets are supplied with a built-in NXP NFC chip, which can also be used to implement patient terminals and grant access authorisations.
