### ALL-MC109-SFP+ – 10G Multi-Gigabit Media Converter RJ45 to SFP+

The ALL-MC109-SFP+ is a high-performance multi-gigabit media converter for connecting copper and fibre optic networks with data rates of up to 10 gigabits. The device reliably converts 10GBase-T RJ45 Ethernet to 10GBase-R SFP+ fibre and is ideal for modern network environments such as data centres, enterprise networks, backbone infrastructures and high-speed data connections.

Thanks to its high compatibility, the media converter supports 5G, 2.5G and 1G Ethernet transmissions in addition to 10G. This means that the ALL-MC109-SFP+ can be used flexibly in existing network structures and enables simple migration to higher bandwidths without replacing the existing infrastructure.

The integrated SFP+ slot allows the use of various fibre optic transceivers for singlemode, multimode, CWDM or DWDM applications. Thanks to signal regeneration and clock recovery technology, the device ensures stable and reliable data transmission even over longer distances.

The compact design, low power consumption and low heat generation ensure reliable 24/7 continuous operation and make the ALL-MC109-SFP+ the ideal solution for professional network installations.

### Supported operating modes:

**1000Base-T <-> 1000Base-X Fibre and vice versa**

**2.5GBase-T <-> 2500Base-X Fibre and vice versa**

**5Gbase-T <-> 5GBase-R Fibre and vice versa**
