EAN CODE

4 0 3 8 8 1 6 1 6 3 8 8 2

Highlights:

- Wall bracket for the ALLNET ALL-CAM2595-LVEN dome camera
- For mounting on walls and parapets, including outdoor use
- Positions the camera at a distance from the wall, ensuring an unobstructed view beneath the dome
- Internal cable routing: network and power cables run safely through the mount
- Robust metal construction in white
- Compact: 242 × 145 × 133 mm and weighing just 575 g
- Can be combined with a suitable pole or corner adapter

Product description:

Not every surveillance area can be covered from the ceiling. With the **ALLNET ALL-CAM2595-LVEN Wall-Mount**, your dome camera is mounted securely and neatly on a wall or parapet. This allows you to monitor façades, outdoor areas, passageways and areas without a suitable ceiling surface.

The extended arm positions the camera at a distance from the wall. This ensures there is sufficient clearance around the dome, allowing the camera to utilise its field of view unobstructed. The bracket is fixed to the wall with screws. The camera is then mounted at the top of the bracket.

Network and power cables are routed through the mount. This ensures a tidy, professional appearance and protects the cables from damage and tampering. The sturdy white metal construction blends unobtrusively into most environments.

ALLNET GmbH - Maistraße 2 - 82110 Germering - sales@allnet.de - 089 / 894 222 22

Errors and technical changes that serve the interests of progress or development of the product, are reserved.

For even greater flexibility, the wall mount can be combined with a suitable pole or corner adapter. This allows the camera to be mounted on poles or building corners as well.
