Compact, powerful, uncompromising – the ideal VMS recorder for NX Witness

The new mini PC with Intel® Core™ i3 N305 – your smart solution for modern video surveillance

Set new standards in video management with our powerful mini PC! Equipped with an **Intel® Core™ i3 N305 processor**, **16 GB RAM** and a fast **256 GB SSD**, this system provides the optimal basis for your NX Witness VMS solution.

Thanks to the two integrated **QuickSnap HDD slots for 3.5"-hard drives**, the storage can be expanded easily and without tools at any time - perfect for growing video archives. Two **Gigabit network ports** ensure a reliable, parallel network connection, for example to separate the camera and management network.

Key features:

- **Intel® i3 N305 processor** – Energy-efficient performance for smooth video streaming and analysis
- **16 GB DDR5 RAM & 256 GB SSD** – Responsive and ready for immediate use
- **2x QuickSnap 3.5"-HDD slots** – Fast hot-swappable storage handling
- **2x LAN (RJ45)** – For optimised network configurations and reliability
- **Optimised for NX Witness VMS** – Fully compatible with one of the leading video surveillance platforms

- Windows 11 pre-installed (no license included), NX Witness software not installed!

Whether in retail, office or industrial environments– this mini PC is the perfect VMS recorder for demanding environments. Its compact design allows for discreet integration without sacrificing performance.

Measurement: 240x138x120mm
